

Montour Solar One

Montour Solar One will provide cost-effective renewable energy to the region. Developed jointly by Pattern Energy and Talen Energy, the solar facility will provide benefits that will last generations.

The project will utilize land owned by Talen Energy, adjacent to Talen's Montour Steam Electric Station that is independent from the Station and will have no impact on its operations.

We believe the best way to build successful facilities is to work closely with local residents in a way that is respectful and fits the needs of the communities that host us.

With an emphasis on relationship building and open communication, we aim to engage local communities, address and incorporate feedback, and further local priorities.

We believe in building opportunity through long-term local partnerships that benefit communities.

Community Revenue

- » Provides added tax revenue to local communities.
 - » Supports the economy through a Community Benefits Program that will contribute to local initiatives and community-based organizations.
-

Economic Investment

- » Represents a projected investment of roughly \$100 million in Montour and Columbia Counties, and the surrounding area.
-

Job Creation

- » The project will inject millions of dollars into the economy, while utilizing local companies, services, materials, and creating local jobs.
 - » 100–150 construction jobs will be needed including heavy equipment operators, electricians, laborers, and others.
-

Economic Boost

- » Increased demand for lodging, food services, gas, groceries, and other local services used by the project team.

Harvesting the Sun

Solar energy provides local and sustainable electricity to the nation's energy mix. Today's solar technologies deliver affordability and reliability even during peak electricity demand, making solar an ideal energy source.

Designed as an approximately 100 MW facility, Montour Solar One will provide safe, affordable, and renewable electricity to power the needs of more than 55,000 Americans yearly. We estimate construction will begin in 2024 with a goal of achieving commercial operation in 2025.

Pattern Energy is a leading renewable energy company that develops, constructs, owns, and operates high-quality wind and solar generation, transmission, and energy storage facilities. Our mission is to transition the world to renewable energy through the sustainable development and responsible operation of facilities with respect for the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in the United States, Pattern has a global portfolio of more than 35 power facilities and transmission assets, serving various customers that provide low-cost clean energy to millions of consumers.

Talen Energy is one of the largest competitive power generation and infrastructure companies in North America. Talen owns and/or controls a diverse generation portfolio consisting of approximately 12,400 megawatts of generating capacity in wholesale U.S. power markets, principally in the Mid-Atlantic, Texas and Montana. Talen is developing a large-scale portfolio of renewable energy, battery storage and digital infrastructure assets across its footprint. Our goal is to lead the energy transition through our Force For Good platform, which will create opportunities for our people and communities as we decarbonize our fleet.
